The information provided in this publication has been obtained from a variety of sources, which SRI Consulting believes to be reliable. SRI Consulting makes no warranties as to the accuracy, completeness or correctness of the information in this publication. Consequently, SRI Consulting will not be liable for any technical inaccuracies, typographical errors or omissions contained in this publication. This publication is provided without warranties of any kind, either express or implied, including but not limited to, implied warranties of merchantability, fitness for a particular purpose, or non-infringement.

IN NO EVENT WILL SRI CONSULTING BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL OR INDIRECT DAMAGES (INCLUDING BUT NOT LIMITED TO DAMAGES FOR LOSS OF PROFITS, BUSINESS INTERRUPTION, OR THE LIKE) ARISING OUT OF THE USE OF THIS PUBLICATION, EVEN IF IT WAS NOTIFIED ABOUT THE POSSIBILITY OF SUCH DAMAGES. BECAUSE SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, THE ABOVE LIMITATION MAY NOT APPLY TO YOU. IN SUCH STATES SRI CONSULTING'S LIABILITY IS LIMITED TO THE MAXIMUM EXTENT PERMITTED BY SUCH LAW.

Certain statements in this publication are projections or other forward-looking statements. Any such statements contained herein are based upon SRI Consulting's current knowledge and assumptions about future events, including, without limitation, anticipated levels of global demand and supply, expected costs, trade patterns, and general economic, political, and marketing conditions. Although SRI Consulting believes that the expectations reflected in the forward-looking statements are reasonable, it cannot, and does not, guarantee, without limitation, future results, levels of activity, performance or achievements. Readers should verify through independent third-party sources any estimates, projections or other forward-looking statements or data contained herein before reaching any conclusions or making any investment decisions. SRI Consulting is not responsible for the Reader's use of any information in this publication.

The absence of a specific trademark designation within this publication does not mean that proprietary rights may not exist in a particular name. No listing, description or designation in this publication is to be construed as affecting the scope, validity, or ownership of any trademark rights that may exist therein. TABLE OF CONTENTS

Introduction.....	8
Water Quality	10
Basic Physical and Chemical Characteristics of a Water Body.....	12
Temperature.....	12
Dissolved Oxygen	13
pH and Alkalinity	13
Turbidity and Suspended Solids.....	14
Salinity and Specific Conductance.....	14
Major Ions	15
Nutrients.....	15
Nitrogen and Phosphorus	16
Silica	16
Metals	17
Mercury.....	17
Organic Matter.....	18
Organic Carbon.....	18
Biochemical Oxygen Demand and Chemical Oxygen Demand.....	18
Biological Components.....	18
Microbes.....	20
Algae and Aquatic Vascular Plants	20
Invertebrates: Zooplankton and Benthic Macroinvertebrates.....	21
Fish	21
Organic Contaminants	21
Polychlorinated Biphenyls.....	22
Oil and Grease.....	22
Hydrological Variables.....	23
Water Quality Monitoring.....	23
Safe and Sustainable Water.....	24
The Global Hydrological Cycle.....	26
Future Water Supply Threats—Overview	32
Urbanization	32
Aquifer Depletion.....	33
Sanitation	34
Industrial Water Requirements.....	34
Agricultural Water Requirements	35
Pollution.....	35
Surface Water Diversion.....	35
Combined Threats	36
Environmental Ethics	36
Sustainable Water Resource Development and Management.....	37
Water Conservation.....	38
Water Reclamation and Reuse.....	39
Guidelines for Water Reuse.....	44
Desalination.....	47
Summary	48
Droughts	49

TABLE OF CONTENTS (cont.)

Emerging Threats to Water Quality	51
Climate Change and Variability.....	52
Dam Removal.....	53
Waterborne and Water-Related Pathogens.....	54
Chemical Contaminants.....	54
Endocrine Disruptors	55
Pharmaceuticals and Personal Care Products	55
Conclusion and Outlook.....	56
Water Demand.....	60
Water Supply.....	62
Supply Management.....	64
Renewable Resources	64
Nonrenewable Resources	64
Water Reuse.....	64
Desalination	65
Desalination Technology Choice.....	67
Reverse Osmosis	68
Multistage Flash (MSF) Desalination.....	69
Multieffect Distillation (MED) Desalination.....	69
Research Directions	70
The Crucial Role of Science	71
Global Water Supply Status.....	73
Groundwater.....	73
Aquifers and Surface Water.....	74
Water Shortages.....	75
United States.....	75
Mexico.....	76
Middle East.....	77
China.....	78
Future Water Scarcity.....	79
Pollution by Toxic Runoff and Sewage.....	79
United States/Mexico	80
Canada	81
Africa.....	82
China.....	82
India.....	83
Other Asia	83
Europe.....	84
Environmental and Ecological Effects of Water Loss	84
Losing the Great Lakes.....	85
Wetland Loss.....	85
Deforestation	86
Global Warming.....	87
Overirrigation and Nonsustainable Farming	87
Dams and Reservoirs.....	89
Droughts.....	90

TABLE OF CONTENTS (cont.)

Conclusions	95
Water Reclamation and Reuse	97
Distribution	98
Distribution System Network	99
Piping Network	99
Distribution Storage.....	100
Pumping Stations.....	101
Water Quality Management Issues in Reclaimed Water Distribution and Storage	101
Physical Water Quality	102
Chemical Water Quality.....	102
Biological Water Quality.....	102
Aesthetic Issues.....	103
Storage in Open Reservoirs	103
Storage in Enclosed Reservoirs.....	104
Treatment Systems.....	104
Decentralized Treatment Systems for Water Reuse.....	104
Satellite Treatment Systems for Water Reuse	105
Interception Type.....	106
Extraction Type.....	106
Upstream Type.....	106
Wastewater Characteristics.....	108
Treatment Technologies for Satellite Systems.....	109
Types of Water Reuse	110
Treatment and Technology Needs	114
Advances in Water Reclamation Technologies.....	116
Challenges for Water Reclamation and Reuse	117
Issues in Water Reuse.....	119
Resource Sustainability.....	119
Future Trends in Water Reuse Applications	120
Direct Potable Water Reuse.....	122
Agricultural Irrigation with Reclaimed Water	124
Global Use of Reclaimed Water in Agriculture	125
Elements for the Design of Reclaimed Water Irrigation Systems	127
Agronomic and Water Quality Considerations	130
Soil Texture	131
Physical Structure.....	131
Soil Depth.....	132
Soil Chemical Characteristics.....	132
Suspended Solids	132
Salinity Impacts	132
Sodicity Impacts.....	135
Specific Ion Toxicity	135
Trace Elements	136
Nutrients.....	137
Nitrogen.....	138

TABLE OF CONTENTS (cont.)

Phosphorus.....	138
Types of Irrigation Systems.....	139
Gravity Surface Flow.....	139
Gravity Subsurface Flow.....	139
Pressurized Surface Systems.....	139
Pressurized Subsurface Systems.....	140
Leaching Requirements.....	140
Estimation of Water Application Rate.....	141
Drainage Systems.....	141
Water Table Depth.....	142
Hydraulic Properties.....	142
Drainage Coefficient.....	142
Drainage Spacing.....	142
Monitoring Requirements.....	143
Industrial Uses of Reclaimed Water.....	146
General Water Quality Considerations.....	148
Corrosion Issues.....	148
Types of Corrosion.....	149
Water Quality Considerations.....	151
Corrosion Management Options.....	152
Scaling Issues.....	153
Cooling Water Systems.....	154
Water Quality Considerations.....	155
Ammonia.....	156
Carbonate and Bicarbonate (Alkalinity).....	156
Calcium.....	156
Phosphate.....	156
Other Chemical Constituents.....	156
Microorganisms.....	156
Water Management Issues.....	157
Public Health Protection.....	157
Corrosion Control.....	158
Scaling.....	158
Biological Fouling.....	159
Boilers.....	159
Water Quality Considerations.....	160
Water Treatment.....	162
Other Industrial Applications.....	162
Desalination.....	163
Current Status of Desalination.....	165
Manufactured Freshwater.....	167
Major Desalination Processes.....	168
Distillation Processes.....	168
Multistage flash evaporation.....	169
Multieffect distillation.....	171

TABLE OF CONTENTS (cont.)

Vapor compression distillation.....	173
Materials and scaling issues.....	174
Membrane Desalination Processes	175
Reverse osmosis	179
Process design considerations	182
Brackish and nanofiltration RO systems	188
Wastewater reclamation	189
Seawater desalting	190
Energy consumption.....	191
Electrodialysis	192
Advantages and disadvantages of electrodialysis versus reverse osmosis	196
Hybrid Desalination Systems.....	200
Economic Aspects.....	201
Energy.....	202
Colocation.....	202
Environmental Effects of Desalination.....	203
Water Intakes	203
Brine Discharge.....	204
Management of Membrane Process Waste Streams	205
Waste Stream Management Issues.....	205
Volume of Retentate	206
Retentate Classification.....	206
Cleaning Solutions.....	206
Waste Stream Reduction Methods	206
Concentration by Multiple-Stage Membrane Arrays.....	207
Solar Evaporation	207
Falling Film Evaporators.....	207
Spray Dryers	208
Membrane Distillation	209
Disposal Options for Concentrated Salt Solutions from Membrane Desalination Processes	209
Discharge to Wastewater Collection System.....	210
Water quality issues	210
Design considerations.....	211
Disposal to Surface Water	211
Water quality issues	211
Design considerations.....	211
Subsurface Injection	212
Water quality issues	212
Design considerations.....	212
Desalination and Climate Change.....	212
Summary and Future Prospects	213
Summary	213
Solar Desalination	215
New Water.....	217
Glossary.....	219
