Safe & Sustainable Chemicals Report

CHEMICAL INPUTS AND BY-PRODUCTS OF BIOFUELS

By
Robert Davenport
with
T. Adrian Gaitan

SRI Consulting reports on Safe & Sustainable Chemicals cover emerging markets, technologies and issues confronting the chemical industry in the twenty-first century. These reports analyze the impact of new energy sources, regulations and other factors on consumption of chemicals and materials now and throughout the immediate future.

For additional information about these reports, contact Bob Davenport:

TABLE OF CONTENTS

Summary	6
Introduction.....	11
Bioethanol.....	13
Overview.....	13
Manufacturing Processes.....	14
Production by Fermentation.....	14
Corn Fermentation By-Product Yields	15
Dry Milling Process.....	17
Wet Milling Process.....	17
Ethanol Production from Cellulose.....	18
Cellulosic Ethanol Challenges.....	18
Research and Development	19
Future Support	19
Cellulose Conversion Processes.....	20
Gasification	20
Hydrolysis.....	22
Chemical Hydrolysis.....	22
Enzymatic Hydrolysis.....	23
Chemical Inputs	24
Chemical Outputs	26
Cellulosic Ethanol Demand.....	26
Sample Companies.....	26
Chemical Inputs.....	27
Drying Agents for Bioethanol	27
Azeotropic Distillation.....	28
Molecular Sieves	30
Chemical Outputs.....	33
Carbon Dioxide.....	33
Agricultural By-Products of Bioethanol.....	35
Biodiesel.....	38
Overview.....	38
Manufacturing Processes.....	39
Transesterification.....	39
Transesterification via Alkaline Catalysis	41
Batch Transesterification of Vegetable Oil	41
Continuous Production of Biodiesel.....	41
Transesterification by Heterogeneous Catalysis.....	42
Transesterification by Nonalkaline Catalysis	42
Transesterification by Acid Catalysis	42
Process Technology Providers.....	42
Neste-NExBTL Process.....	45
Chemical Inputs.....	47
Methanol	47
Ethanol.....	51

TABLE OF CONTENTS

(continued)

Processing Chemicals	51
Transesterification Process Chemicals	52
Additives	54
Pour point depressants	55
Antioxidants	55
Other additives	56
Additive market participants	57
Hydrogen	58
Other Chemical Impacts	60
Summary	60
Chemical Outputs	62
Glycerin	62
Glycerin Production	63
Glycerin Markets	67
Propylene replacement	69
Energy applications	77
Other new or expanding uses for glycerin	81
Purified glycerin	88
Factors for by-product glycerin use	89
Conclusions for glycerin	92
Other By-Products	92
Chemical Uses of Biodiesel Components	92
Solvent	92
Lubricity additive	94
Agricultural By-Products of Biodiesel	94
ETBE	95
Overview	95
Manufacturing Processes	95
Chemical Inputs	96
Biobutanol	97
Overview	97
Production	98
Production Technology	99
Chemical Inputs	102
Chemical Outputs	104
Biomethanol	107
Overview	107
Manufacturing Processes	107
Biomass Gasification	107
Fermentation	108
Glycerin	108

TABLE OF CONTENTS

(concluded)

Biomethane/Biogas.....	109
Overview.....	109
Manufacturing Process.....	110
